RACEMINE EVENT MANAGEMENT

A PRODUCT OF RacePartner™

WHY CHOOSE RACEMINE

The Racemine Platform is a comprehensive solution that offers events a modular approach to accessing registration, on-site registration, event check-in, scoring, live results, mobile results, athlete updated and tracking, and on-site results. This, coupled with timing services from Racemine network of partners provides a one stop shop solution for races.

One Trusted Partner

Work with RM Timing partners and the Racemine support teams for all your race needs. We'll walk you through setting up your event page, registration settings and getting your app live. If you need help, we're just a call away!

One Set of Data

Staff, volunteers and timer can work on the same set of athlete data to manage registration, on-site registration, race check in, and timing. The one set of data in many cases even allows online registration to stay open to the start of the Packet Pick Up.

Live Event Services

Athletes and spectators have new ways to engage with events, from real-time online and mobile results to athlete tracking and even athlete updates on Facebook & Twitter.

Low Cost

Contact us for lowest rates. Free Event Posting. No Contract. No Monthly Fee. No Cancellation Fee.
